INDICES TO VOLUME 41: 1993

AREA INDEX

COMPUTING

Demeulemeester, E., B. Dodin and W. Herroelen, *A Random Activity Network Generator,* 972–980

Farvolden, Judith M., Warren B. Powell and Irvin J. Lustig, *A Primal Partitioning Solution for the Arc-Chain Formulation of a Multicommodity Network Flow Problem,* 669–693

Johnson, Sharon A., Jery R. Stedinger, Christine A. Shoemaker, Ying Li and José Alberto Tejada-Guibert, *Numerical Solution of Continuous-State Dynamic Programs Using Linear and Spline Interpolation,* 484–500

Nielsen, Sorensen S., and Stravros A. Zenios, *A Massively Parallel Algorithm for Nonlinear Stochastic Network Problems,* 319–337

DECISION ANALYSIS, BARGAINING AND NEGOTIATION

Korhonen, Pekka, Herbert Moskowitz, Pekka Salminen and Jyrki Wallenius, *Further Developments and Tests of a Progressive Algorithm for Multiple Criteria Decision Making,* 1033–1045

Moskowitz, Herbert, Paul V. Preckel and Aynang Yang, *Decision Analysis With Incomplete Utility and Probability Information,* 864–879

Smith, James E., Samuel Holtzman and James E. Matheson, *Structuring Conditional Relationships in Influence Diagrams,* 280–297

DISTRIBUTION, TRANSPORTATION AND LOGISTICS

Anily, S., and A. Federgruen, *Two-Echelon Distribution Systems With Vehicle Routing Costs and Central Inventories,* 37–47

Ball, Michael O., and Feng L. Lin, *A Reliability Model Applied to Emergency Service Vehicle Location,* 18–36

Berge, Matthew E., and Craig A. Hopperstad, *Demand Driven Dispatch: A Method for Dynamic Aircraft Capacity Assignment,* 153–168

Bertsimas, Dimitris, and Garrett van Ryzin, *Stochastic and Dynamic Vehicle Routing in the Euclidean Plane With Multiple Capacitated Vehicles,* 60–76

Birge, John R., and James K. Ho, *Optimal Flows in Stochastic Dynamic Networks With Congestion,* 203–216

Brimberg, Jack and Robert F. Love, *Global Convergence of a Generalized Iterative Procedure for the Minisum Location Problem With l_p Distances,* 1153–1163

Brumelle, S. L., and J. I. McGill, *Airline Seat Allocation With Multiple Nested Fare Classes,* 127–137

Carey, Malachy, and Ashok Srinivasan, *Externalities, Average and Marginal Costs, and Tolls on Congested Networks With Time-Varying Flows,* 217–231

Crainic, Teodor Gabriel, Michel Gendreau and Pierre Dejax, *Dynamic and Stochastic Models for the Allocation of Empty Containers,* 102–126

Davis, Gary A., and Nancy L. Nihan, *Large Population Approximations for a General Stochastic Traffic Assignment Model,* 169–178

Diaby, Moustapha, and Alain Martel, *Dynamic Lot Sizing for Multi-Echelon Distribution Systems With Purchasing and Transportation Price Discounts,* 48–59

Dror, Moshe, and Warren J. Powell, *Preface to Special Issue on Stochastic and Dynamic Models in Transportation,* 11–14

Friesz, Terry L., David Bernstein, Tony E. Smith, Roger L. Tobin and B. W. Wie, *A Variational Inequality Formulation of the Dynamic Network User Equilibrium Problem,* 179–191

Minkoff, Alan S., *A Markov Decision Model and Decomposition Heuristic for Dynamic Vehicle Dispatching,* 77–90

Psaraftis, Harilaos N., and John N. Tsitsiklis, *Dynamic Shortest Paths in Acyclic Networks With Markovian Arc Costs,* 91–101

Ran, Bin, David E. Boyce and Larry J. LeBlanc, *An Instantaneous Dynamic User-Optimal Traffic Assignment Model,* 192–202

Rosen, J. B., and G. L. Xue, *On the Convergence of a Hyperboloid Approximation Procedure for the Perturbed Euclidean Multifacility Location Problem,* 1164–1171

Soumis, François, and Anna Nagurney, *A Stochastic, Multiclass Airline Network Equilibrium Model,* 721–730

Terrab, Mostafa, and Amedeo R. Odoni, *Strategy Flow Management for Air Traffic Control,* 138–152

MILITARY APPLICATIONS

Bracken, Jerome, and Martin Shubik, *Worldwide Nuclear Coalition Games: A Valuation of Strategic Offensive and Defensive Forces,* 655–668

Kalbaugh, D. V., *Optimal Search Density for a Stationary Target Among Stationary False Targets,* 310–318

Robinson, Stephen M., *Shadow Prices for Measures of Effectiveness, I: Linear Model,* 518–535

Robinson, Stephen M., *Shadow Prices for Measures of Effectiveness, II: General Model,* 536–548

NEW/NONTRADITIONAL AREAS

Caulkins, Jonathan P., *Local Drug Markets' Response to Focused Police Enforcement,* 848–863

OPTIMIZATION

Aggarwal, Alok, and James K. Park, *Improved Algorithms for Economic Lot Size Problems,* 549–571

Anstreicher, Kurt M., and Patrick Watteyne, *A Family of Search Directions for Karmarkar's Algorithm,* 759–767

Brumelle, Shelby, and Daniel Granot, *The Repair Kit Problem Revisited,* 994–1006

Diaby, Moustapha, *Implicit Enumeration for the Pure Integer 0/1 Minimax Programming Problem,*

Eck, Brian Thomas, and Michael Pinedo, *On The Minization of the Makespan Subject to Flowtime Optimality,* 797–800

Feo, Thomas A., and J. Scott Provan, *Delta-Wye Transformations and the Efficient Reduction of Two-Terminal Planar Graphs,* 572–582

Fischetti, Matteo, Gilbert Laporte and Silvano Martello, *The Delivery Man Problem and Cumulative Matroids,* 1055–1064

Monma, Clyde L., and Chris N. Potts, *Analysis of Heuristics for Preemptive Parallel Machine Scheduling With Batch Setup Times,* 981–993

Orlin, James B., *A Faster Strongly Polynomial Minimum Cost Flow Algorithm,* 338–350

OR FORUM

Bankes, Steve, *Exploratory Modeling for Policy Analysis,* 435–449

Corbett, Charles J., and Luk N. Van Wassenhove, *The Natural Drift: What Happened to Operations Research?,* 625–640

Murphy, Frederic H., *Making Large-Scale Models Manageable: Modeling From an Operations Management Perspective,* 241–252

OR PRACTICE

Adler, Leonard, Nelson Fraiman, Edward Kobacker, Michael Pinedo, Juan Carlos Plotnicoff and Tso-Pang Wu, *BPSS: A Scheduling Support System for the Packaging Industry,* 641–648

Barnhart, Cynthia, Ellis L. Johnson, George L. Nemhauser, Gabriele Sigismondi and Pamela Vance, *Formulating a Mixed Integer Distribution Problem to Improve Solvability,* 1013–1019

Bradley, Michael D., and Donald M. Baron, *Measuring Performance of a Multiproduct Firm: An Application to the U. S. Postal Service,* 450–458

Burnett, William M., Barry C. Silverman and Dominic J. Monetta, *R&D Project Appraisal Methdology at the Gas Research Institute, Part II,* 1020–1032

Faaland, Bruce, and Tom Schmitt, *Cost-Based Scheduling of Workers and Equipment in a Fabrication and Assembly Shop,* 253–268

Fleurent, Charles, and Jacques A. Ferland, *Allocating Games for the NHL Using Integer Programming,* 649–654

Franz, Lori S., and Janis L. Miller, *Scheduling Medical Residents to Rotations: Solving the Large-Scale Multiperiod Staff Assignment Problem,* 269–279

Lee, Hau L., and Corey Billington, *Material Management in Decentralized Supply Chains,* 835–847

Martin, Jack L., and Terry P. Harrison, *Design and Implementation of an Expert System for Controlling Health Care Costs,* 819–834

Rautman, Christopher A., Richard A. Reid and Eric E. Ryder, *Scheduling the Disposal of Nuclear Waste Material in a Geologic Repository Using the Transportation Model,* 459–469

SERVICES

Caulkins, Jonathan P., Arnold Barnett, Patrick D. Larkey, Yuehong Yuan and Jesse Goranson, *The On-Time Machines: Some Analyses of Airline Punctuality,* 710–720

Smith, Stephen A., *A Linear Programming Model for Real-Time Pricing of Electric Power Service,* 470–483

Woodbury, Max A., Kenneth G. Manton and James C. Vertrees, *A Model for Allocating Budgets in a Closed System Which Simultaneously Computes DRG Allocation Weights,* 289–309

SIMULATION

Clemen, Robert T., *Comment on 'A Randomization Rule for Selecting Forecasts,'* 801–802

Donohue, Joan M., Ernest C. Houck and Raymond H. Myers, *Simulation Design and Correlation Induction for Reducing Second-Order Bias in First-Order Response Surfaces,* 880–902

Foster, Dean P., and Rakesh V. Vohra, *A Randomization Rule for Selecting Forecasts,* 704–709

Foster, Dean P., and Rakesh V. Vohra, *Reply to Professor Clemen,* 802–803

Song, Wheyming Tina, and Bruce W. Schmeiser, *Variance of the Sample Mean: Properties and Graphs of Quadratic-Form Estimators,* 501–517

Zazanis, Michael A., and Rajan Suri, *Convergence Rates of Finite-Difference Sensitivity Estimates for Stochastic Systems,* 694–703

STOCHASTIC PROCESSES & THEIR APPLICATIONS

Altman, Eitan, and Adam Shwartz, *Time-Sharing Policies for Controlled Markov Chains,* 1116–1124

Bitran, Gabriel R., and Sriram Dasu, *Approximating Nonrenewal Processes by Markov Chains: Use of Super-Erlang (SE) Chains,* 903–923

Blumenthal, Saul, *New Approximations for the Event Count Distribution for Superimposed Renewal Processes at the Time Origin With Application to the Reliability of New Series Systems,* 409–418

Chen, Hong, and David D. Yao, *Dynamic Scheduling of a Multiclass Fluid Network,* 1104–1115

Eick, Stephen G., William A. Massey and Ward Whitt, *The Physics of $M_t/G/\infty$ Queue,* 731–742

Glynn, Peter W., Benjamin Melamed and Ward Whitt, *Estimating Customer and Time Averages,* 400–408

Lovejoy, William S., *Suboptimal Policies, With Bounds, for Parameter Adaptive Decision Processes,* 583–599

Stadje, Wolfgang, *A Direct Approach to the GI/G/1 Queueing System With Finite Capacity,* 600–607

SUBJECT INDEX

The subject index conforms to the categories established in the OR/MS Index, 1952–1976, 1976–1981 and 1982–1987. The 1952–1976 cumulative index was compiled by Kneale T. Marshall and F. Russell Richards, the 1976–1981 cumulative index was compiled by Jon W. Tolle and Richard E. Stone, and the 1982–1987 cumulative index was compiled by Jon W. Tolle. The indices were published in 1978, 1983 and 1988 by the Institute of Management Sciences and the Operations Research Society of America.

A

Analysis of algorithms
Aggarwal, A., optimal and suboptimal algorithms, 549–571

Analysis of algorithms, data structures
Feo, T. A., efficient structure for solving many types of network problems, 572–582

C

Computers/computer science
Aggarwal, A., faster lot sizing using Monge arrays, 549–571
Bankes, S., system design, 435–449
Nielsen, S. S., massively parallel, 319–337

Computers/computer science, artificial intelligence
Viswanathan, K. V., search methods, 768–776

Cost analysis
Woodbury, M. A., adjustment of payment for medical need, 298–309

D

Decision analysis
Burnett, W. M., multiple criteria, 1020–1032
Korhonen, P., sequential, 1033–1045
Lovejoy, W. S., Bayesian dynamic programming, 583–599

Decision analysis, applications
Brumelle, S. L., stochastic, integer capacity allocation, 127–137

Decision analysis, influence diagrams
Smith, J. E., representing and solving decision problems, 280–297

Decision analysis, multiple criteria
Altman, E., Markov decision processes with several constraints, 1116–1124

Decision analysis, risk
Moskowitz, H., decision analysis with imprecise, incomplete information, 864–879

Dynamic programming/optimal control
Hamada, T., Bayesian, dynamic allocation index, 924–934
Lovejoy, W. S., parameter adaptive decision processes, 583–599
Ran, B., deterministic application model, 192–202

Dynamic programming/optimal control, applications
Johnson, S. A., numerical solution of continuous-state dynamic programs, 484–500
Terrab, M., limited lookahead and heuristics, 138–152

Dynamic programming/optimal control, Markov
Altman, E., nonstationary policies, sample path properties, 1116–1124

Dynamic programming/optimal control, Markov, infinite state
Johnson, S. A., higher-order approximation of the value function, 484–500
Minkoff, A. S., Markov decision model for vehicle dispatching, 77–90

E

Economics
Caulkins, J. P., markets for illicit drugs, 848–863

Economics, econometrics
Bradley, M. D., using econometric models, 450–458

Education systems, operations
Franz, L. S., scheduling medical residents, 269–279
Woodbury, M. A., output based models for reimbursement, 298–309

F

Facilities/equipment planning
Rosen, J. B., location, 1164–1171

Facilities/equipment planning, design
Rautman, C. A., disposal of spent nuclear fuel, 459–469

Facilities/equipment planning, location
Ball, M. O., facility and vehicle location, 18–36

Facilities/equipment planning, location, continuous
Brimberg, J., convergence of a procedure for location with l_p distances, 1153–1163

Forecasting
Clemen, R. T., combining forecasts, 801–802
Foster, D. P., combining forecasts, 704–709, 802–803

G

Games/group decisions
Bracken, J., incentives to initiate nuclear warfare, 655–668

Government, agencies
Caulkins, J. P., DOT on-time statistics, 710–720
Government, energy policies
Rautman, C. A., geologic repository program, 459–469

H

Health care
Martin, J. L., health care insurance coverage, 819–834
Health care, hospitals
Franz, L. S., scheduling medical residents, 269–279
Woodbury, M. A., output based models for reimbursement, 298–309

I

Industries, electric
Smith, S. A., electric power industry, 470–483
Industries, transportation/shipping
Farvolden, J. M., transshipment and consolidation problems, 669–693
Information systems
Adler, L., decision support systems, 641–648
Burnett, W. M., decision support systems, 1020–1032
Martin, J. L., used in auditing health care claims, 819–834
Information systems, management
Faaland, B., coordination of a fabrication and assembly process, 253–268
Inventory/production
Aggarwal, A., faster algorithms for various Wagner-Whitin models, 549–571
Anily, S., approximations and heuristics; multi-item, multi-echelon, multistage, 37–47
Diaby, M., multi-echelon lot sizing, 48–59
Lee, H. L., inventory applications and multistage systems, 835–847
Lovejoy, W. S., policies under uncertainty, 583–599
Pieńkosz, E., a single-stage lot size model, 419–426
Roundy, R.O., deterministic lot sizing, multi-item, multistage heuristics, 371–385
Song, J-S., fluctuating demand environment, 351–370
Inventory/production, heuristics
Lane, D. E., algorithms for FMS hub scheduling, 1091–1103
Inventory/production, multi-echelon
Axsäter S., batch-ordering policies, identical retailers, 777–785
Inventory/production, multistage
Trietsch, D., overlapping operations on consecutive resources, 1065–1076
Inventory/production, parametric analysis
Faaland, B., minimizing material, labor, inventory carrying and lateness costs, 253–268
Inventory/production, policies
Faaland, B., scheduling jobshop orders with accurate lead times, 253–268
Inventory/production, sensitivity analysis
Brumelle, S., repair kits, 994–1006
Inventory/production, stochastic
Axsäter, S., Poison demand, continuous review, 777–785

J

Judicial/legal
Caulkins, J. P., drug policy, 848–863

L

Labor
Bechtold, S. E., finding the optimal timing and length of a common rest break,

M

Manufacturing
Dallery, Y., modeling and performance evaluation, 386–399
Lee, H. L., supply chain management, 835–847
Manufacturing, productivity
Bradley, M. D., performance measurement system, 450–458
Marketing, pricing
Smith, S. A., real-time pricing, 470–458
Mathematics, combinatorics
Fischetti, M., cumulative matroid problems, 1055–1064
Military, cost effectiveness
Robinson, S. M., shadow pricing, 518–535, 536–548
Military, force effectiveness
Robinson, S. M., force-on-force models, 518–535, 536–548
Military, warfare models
Bracken, J., strategic offensive and defensive nuclear warfare, 655–668

N

Networks/graphs
Berge, M. E., heuristic multicommodity flow algorithm, 153–168
Bertsimas, D. J., traveling salesman, 60–76
Demeulemeester, E., stochastic theory, 972–980
Friesz, T. L., theory, 179–191
Nielsen, S. S., stochastic generalized networks, 319–337

Ran, B., multicommodity, 192–202
Soumis, F., airline transportation, 721–730
Networks/graphs, flow algorithms
Orlin, J. B., a faster strongly polynomial minimum cost flow algorithm, 338–350
Ran, B., multicommodity, 192–202
Networks/graphs, distance algorithms
Psaraftis, H. N., Markovian cost structure, 91–101
Networks/graphs, flow algorithms
Feo, T. A., solves a class of flow equilibrium problems, 572–582
Networks/graphs, multicommodity
Crainic, T. G., transportation of empty containers, 102–126
Farvolden, J. M., primal partitioning solution, 669–693
Networks/graphs, stochastic
Psaraftis, H. N., dynamic shortest paths, 91–101
Networks/graphs, theory
Feo, T. A., reduction method for 2-terminal planar graphs, 572–582

O

Organizational studies, effectiveness/performance
Caulkins, J. P., rating on-time performance, 710–720

P

Philosophy of modeling
Bankes, S., exploratory modeling, 435–449
Murphy, F. H., managing large models, 241–252
Probability
Bertsimas D. J., stochastic model, 60–76
Probability, distributions
Blumenthal, S., new approximations for event count of superimposed renewals, 409–418
Probability, Markov processes
Bitran, G. R., approximating nonrenewal processes by Markov chains, 903–923
Davis, G. A., street traffic generation and assignment, 169–178
Probability, renewal processes
Blumenthal, S., superposition of identical processes at the time origin, 409–418
Zazanis, M. A., stochastic model applications, 694–703
Production/scheduling
Bowman, R. A., cyclic, 947–958
Chen, H., dynamic control, resource allocation, 1104–1115
Chevalier, P. B., priority sequencing in a stochastic jobshop, 743–758
Diaby, M., production line balancing, 1172–1176
Hamada, T., sequencing, stochastic, single machine, 924–934
Inman, R. R., decomposition for hierarchical production planning, 608–617
Krishnamurthy, N. N., planning, 1077–1090
Monma, C. L., identical parallel machines, preemption, batch setup times; heuristics, worst-case analysis, 981–993
Murphy, F. H., applying operations management techniques to model operations, 241–252
Pieńkosz, E., feasibility of aggregate production plans, 419–416
Roundy, R. O., production planning and lot sizing, 371–385
Trietsch, D., flowshop scheduling for batch production, 1065–1076
Production/scheduling, applications
Adler, L., sequencing, multiple machines, 641–648
Klein, R. S., allocation of manufacturing resources, 959–971
Production/scheduling, cutting stock/trim
Viswanathan, K. V., rectangular stock sheets, 768–776
Production/scheduling, flexible manufacturing
Inman, R. R., scheduling families of parts, 608–617
Lane, D. E., scheduling deterministic hub networks, 1091–1103
Production/scheduling, multiple machine
Trietsch, D., transfer lot scheduling, 1065–1076
Production/scheduling, sequencing
Mittenthal, J., early/tardy quadratic penalty functions, 786–796
Production/scheduling, sequencing, deterministic
Eck, B. T., worst-case analysis of parallel machines scheduling problem, 797–800
Production/scheduling, sequencing, stochastic
Birge, J. R., routing and scheduling in dynamic networks, 203–216
Production/scheduling, stochastic
Mittenthal, J., random breakdown, 786–796
Professional
Corbett, C. J., comments on; OR/MS philosophy, 625–640
Programming
Brumelle, S., minimizing a submodular function, 994–1006
Chen, H., linear, parametric, 1104–1115
Diaby, M., integer, branch and bound, relaxation/subgradient, 48–59
Friesz, T. L., infinite-dimensional, 179–191
Korhonen, P., multiple criteria, 1033–1045
Programming, fractional
Eck, B. T., worst-case analysis of parallel machines scheduling problem, 797–800

Programming, integer, algorithms
Barnhart, C., solving a distribution problem, 1013–1019
Diaby, M., Benders decomposition, 1172–1176
Programming, integer, applications
Fleurent, C., games allocation for a sport league, 649–654
Martin, J. L., Lagrangian relaxation, 819–834
Programming, integer, heuristics
Franz, L. S., multiperiod staff assignment problems, 269–279
Thompson, P. M., cyclic transfer algorithms for fleet planning problems, 935–946
Programming, linear, algorithms
Anstreicher, K. M., directions for projective algorithm, 759–767
Programming, linear, applications
Smith, S. A., electric power planning, 470–483
Programming, linear, large-scale systems
Farvolden, J. M., multicommodity network flow problems, 669–693
Programming, linear and nonlinear, algorithms
Klein, R. S., minimax algorithm for substitutable resources, 959–971
Programming, multiple criteria
Brumelle, S., Pareto optimality, 994–1006
Programming, nonlinear algorithms
Bechtold, S. E., an efficient algorithm for a mixed-binary cubic problem, 1046–1054
Programming, quadratic
Woodbury, M. A., optimization under covariate constraints, 298–309
Programming, stochastic
Birge, J. R., multistage stochastic nonlinear programming, 203–216
Nielsen, S. S., nonlinear algorithms, 319–337
Project management, PERT
Bowman, R. A., Markovian networks, 947–958
Demeulemeester, E., resource constraints, 972–980

Q

Queues
Chen, H., fluid network, multiclass, 1104–1115
Chevalier, P. B., Brownian models of network scheduling problems, 743–758
Queues, approximations
Bitran, G. R., approximating arrival processes to queues, 903–923
Dallery, Y., decomposition methods, 386–399
Eick, S. G., infinite-server queues with time-dependent arrival rates, 731–742
Queues, limit theorems
Glynn, P. W., central limit theorems for customer and time averages, 400–408
Queues, nonstationary
Eick, S. G., simple formulas for infinite-server models, 731–742
Queues, optimization
Xu, S. H., admission control policy, 1137–1152
Xu, S. H., bulking and reneging ordered-entry queues, FCFS, LCFS, 1137–1152
Queues, statistical inference
Glynn, P. W., estimating customer and time averages, 400–408
Queues, tandem
Dallery, Y., tandem queueing networks with blocking, 386–399
Queues, transient results
Eick, S. G., the magnitude and time of peak congestion, 731–742
Stadje, W., explicit results for finite capacity queues, 600–607

R

Recreation and sports
Fleurent, C., games allocation for a sport league, 649–654
Reliability
Ball, M. O., integer programming models with reliability constraints, 18–36
Reliability, multistate systems
Van der Duyn Schouten, F. A., simple replacement policies, 1125–1136
Reliability, quality control
Blumenthal, S., acceptance tests of new series systems, 409–418
Reliability, replacement/renewal
Van der Duyn Schouten, F. A., systems with many identical components, 1125–1136
Research and development
Burnett, W. M., project selection, 1020–1032

S

Search and surveillance
Kalbaugh, D. V., stationary target among random, stationary false targets, 310–318
Simulation
Donohue, J. M., design of experiments, 880–902
Song, W. T., statistical analysis, 501–517
Zazanis, M. A., simulation efficiency, 694–703
Simulation, applications
Bechtold, S. E., measuring employee work-group performance, 1046–1054
Simulation, statistical analysis
Zazanis, M. A., statistical analysis of simulation, 694–703

Statistics
Donohue, J. M., estimation of first-order response surfaces, 880–902
Song, W. T., estimation, 501–517
Statistics, estimation
Glynn, P. W., averages over time and at embedded points, 400–408

T

Transportation
Anily, S., vehicle routing, 37–47
Bertsimas D. J., vehicle routing, 60–76
Brumelle, S. L., airline seat inventory control, yield management, 127–137
Caulkins, J. P., aviation, commercial airlines' punctuality, 710–720
Friesz, T. L., models, network, 179–191
Krishnamurthy, N. N., freight/materials handling; traffic models, 1077–1090
Rautman, C. A., scheduling nuclear waste burial, 459–469
Rosen, J. B., location model, 1164–1171
Soumis, F., stochastic, dynamic network equilibrium, 721–730
Transportation, freight
Crainic, T. G., allocation of empty containers, 102–126
Transportation, models
Barnhart, C., solving a distribution problem, 1013–1019
Berge, M. E., dynamic aircraft capacity assignment, 153–168
Ran, B., network traffic assignment, 192–202
Terrab, M., air traffic control flow management, 138–152
Transportation, models, assignment
Davis, G. A., Markov assignment process, 169–178
Transportation, models, location
Ball, M. O., facility and vehicle location, 18–36
Transportation, models, network
Birge, J. R., dynamic traffic assignment networks, 203–216
Carey, M., dynamic flows and externalities, 217–231
Crainic, T. G., stochastic and dynamic flow models, 102–126
Psaraftis, H. N., dynamic and stochastic problems, 91–101
Transportation, models, traffic
Carey, M., dynamic flows and congestion, 217–231
Transportation, route selection
Minkoff, A. S., route selection for inventory replenishment, 77–90
Transportation, scheduling
Fischetti, M., single machine sequencing with changeover costs, 1055–1064
Transportation, vehicle routing
Fischetti, M., routing problems with cumulative distances, 1055–1064
Thompson, P. M., cyclic transfer algorithms for multivehicle problems, 935–946

U

Utility/preference
Korhonen, P., applications, multiattribute theory, 1033–1045

Statement of Ownership, Management and Circulation
(Required by 39 U.S.C. 3685)

1A. Title of Publication	1B. PUBLICATION NO.	2. Date of Filing
OPERATIONS RESEARCH	0 0 3 0 3 6 4 X	10-1-93
3. Frequency of Issue	3A. No. of Issues Published Annually	3B. Annual Subscription Price
Bi-monthly	6	$ 45.00

4. Complete Mailing Address of Known Office of Publication (Street, City, County, State and ZIP+4 Code) (Not printers)
1314 Guilford Avenue, Baltimore, MD 21202

5. Complete Mailing Address of the Headquarters or General Business Offices of the Publisher (Not printer)
1314 Guilford Avenue, Baltimore, MD 21202

6. Full Names and Complete Mailing Address of Publisher, Editor, and Managing Editor (This item MUST NOT be blank)
Publisher (Name and Complete Mailing Address)
Operations Research Society of America
1314 Guilford Avenue, Baltimore, MD 21202
Editor (Name and Complete Mailing Address)
H. Donald Ratliff, School of Industrial & Systems Engineering, Georgia Institute of Technology, Atlanta, GA 30332, USA
Managing Editor (Name and Complete Mailing Address)
Rona A. Ginsberg, School of Industrial & Systems Engineering, Georgia Institute of Technology, Atlanta, GA 30332, USA

7. Owner (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given. If the publication is published by a nonprofit organization, its name and address must be stated.) (Item must be completed.)
